Everything we do at AustralianSuper is designed to help everyday Australians achieve their best retirement.

As the largest super fund in the country and one of the biggest funds in the world, our size and scale mean you have access to some of the world’s best investments.

Choosing how to invest your super is a big decision. This guide can help make it an easier one. You’ll look at your investment needs and then go through your options in more detail.
Define what type of investor you are

Here you’ll start to find out what type of investor you are and build an understanding about:
› how long you’re investing for
› the types and levels of investment risk and how you feel about them
› how hands-on you want to be with your investments
› how to minimise risk.
What type of investor are you?

There are many different ways to invest money, which suit different people according to age, situation and personality. Use this section to work out what type of investor you are – how you feel about investment risk, what your investment timeframe is and how involved you want to be in managing your super.

How long you're investing for

Your investment timeframe is how long you plan to invest your super savings before you retire, as well as how long you want your savings to last once you do retire.

Take a look at the table alongside to see how long you might need to keep your savings invested in super based on how old you are now and your current life expectancy. Keep in mind the timeframes shown are averages so you may well live beyond these ages.

Investment risks and how you feel about them

All investments have risks, so it’s important to understand how you feel about risk. This will help you in your investment option selection.

You’ll also need to weigh this up with your investment timeframe and your retirement goals, including how you want to use your money when you retire.

Only 10% of Australians feel very well prepared for retirement

Many people retire earlier than they think.

50% 40% 10%

Earlier than planned At the age expected Later than planned

Focus on the long-term
Superannuation is a long-term investment. While it can be distressing to see the returns of the current downturn and volatility in the sharemarket due to COVID-19, we encourage you to take a long-term view.
A look back over history can be reassuring. It shows that significant sharemarket downturns and recessions are not uncommon, and indeed should be anticipated over a lifetime of investing. Before 2020, the last major sharemarket downturn was the Global Financial Crisis (GFC) in 2008. At the time, it was a very challenging period, as there were large daily swings in super balances. But the important thing to remember is that markets did eventually recover, and we experienced strong investment returns over an extended period.

Different types of investments perform differently over time
If 30 years ago you put $50,000 into different types of investments (we call these asset classes), your money would have grown in each asset class – some much more than others. What’s also interesting to see are the different ways they grew over time.

This 30-year period shows the benefits of diversifying across several asset classes, as the investment performance of some markets can be lacklustre for an extended period of time. For example, international shares had poor performance from when the tech bubble burst in 2000 and during the GFC, underperforming against the other asset classes. This was followed by favourable returns over the last ten years, outperforming the other asset classes.
The cash return was steady over the 30 year period and grew less than asset classes such as Australian shares, direct property or fixed interest. Cash provides stability compared to the more volatile shares investments. However, the downside of investing in cash is that it reduces the opportunity to grow your super savings and it may not keep up with rising costs of daily living, measured by inflation.

Short-term risks are different to long-term risks
In the short term, the key risk is investment market volatility and the risk your super savings will be reduced by the market’s ups and downs.
The long-term key risk is inflation and the risk that your super savings won’t grow to meet it.

Asset class returns 31 March 1990 to 31 March 2020

The information in this graph has been prepared using data from the following market indices: Australian shares – S&P/ASX 300 Accumulation Index since 31 March 2000, prior All Ordinaries; International shares – MSCI All Country World ex Australia Index with net dividends reinvested (unhedged) in AUD since 31 December 2000, prior MSCI AC World ex Australia Index with gross dividends reinvested (unhedged) in AUD; Direct property – Mercer/IPD Australia Unlisted Wholesale Property Fund Index; Bonds – 50% Bloomberg AusBond Composite 0+Yr Index + 50% Barclays Global Aggregate Bond Index, hedged to AUD; Cash – Bloomberg AusBond Bank Bill Index.

Investment returns are not guaranteed. Past performance is not a reliable indicator of future performance.

Volatility and inflation are two of the key risks that can impact your investments. It’s important to know about other risks which can also affect your super in different ways, including interest rate movements or changes to super rules and regulations. For more information about types of risk, visit australiansuper.com/RiskTypes
The risk of inflation over the long-term

Inflation reduces the value of money over time. This means the money you have saved now will be worth less in the future. Inflation is something you need to think about when choosing your investment options, particularly if you’ve got a long-term investment timeframe.

30 years from now, you may need more than double the money to buy what you can today.

<table>

The above examples assume an annual inflation rate of 2.5% each year.
Decide how hands-on you want to be with your investments

Choosing the right investment is important. It can affect how much your savings grow and how long they last. You can decide to either leave your investment choice to us or choose and manage your own.

Listed below are the investment options you can choose from. You can choose one or a variety of options*. If you’d prefer us to choose for you, your super savings will go into our Balanced investment option. You can also make and change investment choices after you become a member.

**PreMixed options**

*Hands-on level: Low*

PreMixed options are diversified options that invest across different combinations of asset classes such as shares, property, infrastructure, fixed interest and cash.

Your PreMixed choices are:
- High Growth
- Balanced (default investment option)
- Socially Aware
- Indexed Diversified
- Conservative Balanced
- Stable.

**DIY Mix options**

*Hands-on level: Medium*

DIY Mix options are single asset class portfolios. You choose how much you want to invest in each in a mix that can also include one or more PreMixed options.

Your DIY Mix choices are:
- Australian Shares
- International Shares
- Property
- Diversified Fixed Interest
- Cash.

**Member Direct option**

*Hands-on level: High*

The Member Direct investment option gives you the greatest control of all options.

You invest your own super in a range of listed securities, including:
- Shares in the S&P/ASX 300 Index
- Exchange Traded Funds (ETFs)
- Listed Investment Companies (LICs)
- Term deposits.

If you’re a super member with us, you’ll need $10,000 or more in your account to invest in Member Direct. If you’re a retirement income member, it’s $50,000.

---

* Some restrictions apply to Property and Member Direct.
How to minimise risk

So far, we’ve focused on helping you work out what type of investor you are, how comfortable you are with investment risks and the amount of control you want. Here are a few other things to consider when making your investment choice, as well as some ways to help manage your investment strategy and minimise risk.

Mixing it up can help
Investing in a mix of investments (diversification) can help protect your investments against market ups and downs. Spreading your investments across a variety of companies, industries and regions in different asset classes can help reduce the risk of negative returns. Diversification is particularly important to consider if you’re planning to build your own strategy with our DIY Mix options or invest your own super using Member Direct. Our PreMixed options are already diversified and each option has a different mix of assets.

Focus on your long-term needs
Watching your super balance go up and down can be unsettling. While it can be tempting to change investment options when markets are down, it isn’t always the best approach. Investments that are volatile over short periods of time usually grow more over longer periods.

It’s normal for markets to change
Most investments go up and down over time. Market movements can mean the asset allocation of your portfolio moves away from its original strategy and changes your risk level.
In our PreMixed options, we actively adjust the asset allocation so it reflects our strategy. If you invest in our DIY Mix options or Member Direct, you’ll have to manage this yourself.

Review your strategy
When your circumstances or objectives change, it’s a good idea to review your strategy to ensure it’s still right for you. For example, you might be nearing retirement and need to access some of your super in the short term.

Consider seeking financial advice
The best option is the one that suits your investment timeframe, circumstances and goals. A professional financial adviser can help you develop an investment strategy to meet your needs, which could make a big difference to your retirement savings over the long-term.

To find out more about your advice options and how to get the help you need, see page 35.
Look at your investment options

In this section you’ll find details about your investment options, including the investment aims, asset allocations and risk levels for each one. If you invest in our PreMixed options, we manage things for you. You can build your own mix of investment types by investing in our DIY Mix options. We also offer Member Direct which allows you more control over how your super savings are invested.
**Risk levels of investment options**

When choosing your investment options, the risks you need to consider will be different depending on how long you plan to invest for.

<table>
<thead>
<tr>
<th>Our investment options are split into short, medium and long-term risk levels.</th>
<th>Short-term</th>
<th>Medium-term</th>
<th>Long-term</th>
</tr>
</thead>
<tbody>
<tr>
<td>If you plan to invest for under 5 years</td>
<td>Investments may be reduced by market volatility and not have time to recover.</td>
<td>If you plan to invest for 5–20 years</td>
<td>Investments may be reduced by market volatility and/or your savings might not keep up with wage inflation.</td>
</tr>
<tr>
<td>If you plan to invest for 5–20 years</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>The way we work out the risk levels for each option is different depending on whether it's for the short, medium or long-term.</td>
<td>The short-term risk level is the same as the Standard Risk Measure, which is used across the super industry to help members compare the risk levels of investment options. The short-term risk level classifies investment options according to their likelihood of negative returns in a given year.</td>
<td>The medium-term risk level is a combination of the short-term and long-term risk levels.</td>
<td>The long-term risk levels are determined by estimating the likelihood of investments within each option resulting in a projected retirement outcome that is worse than wage inflation.</td>
</tr>
</tbody>
</table>

Read more about how we calculate risk levels at [australiansuper.com/RiskLevels](http://australiansuper.com/RiskLevels)
Risks and your investment timeframe
The scenarios below highlight just some of the things you could consider when looking at options for investment timeframes.

**Short-term (under 5 years)**

You’ve already retired or are planning to soon and you want to use your savings in the next few years.

As you’re planning to use your savings in the next few years, you may be more concerned with protecting your existing savings than taking chances to grow them. Consider an option with a lower risk level in the short term like Cash.

**Medium-term (5-20 years)**

You want your super savings to last as long as possible in your retirement.

Getting the balance right is the key: you may want to invest some money in lower-risk options, but you may need to look at how aggressively you invest the rest so your savings grow faster than wage inflation.

**Long-term (over 20 years)**

Retirement isn’t really on your horizon yet, so growing your savings and maximising your returns is your priority.

For strong returns over the long-term, consider a more aggressive strategy. Look at options that have a higher short-term risk level but a lower risk level over the long-term like our Balanced, High Growth, Australian Shares or International Shares options.
Asset classes

Asset classes are the building blocks of your investment. Some investment options invest in one asset class, while others include a mix. We invest in the following asset classes:

**Cash**
Money market securities such as deposits, bank bills and short-term bonds that are issued by banks, the Australian Government and some companies.

**Credit**
Debt securities, leases, royalties, hybrids and loans issued by both investment grade and high yield companies and other financial entities, such as government agencies, special purpose vehicles (SPV) and emerging market governments. Returns are mainly driven by the credit quality of the underlying issuer of the debt. Credit is a subset of the fixed income asset class and in our portfolios is managed separately from the sovereign investment grade bonds.

**Fixed interest**
Loans, bonds and securitised debt issued by governments, companies and banks that pay regular interest income over a set term. The principal amount lent is repaid when the security matures. These securities in the fixed income portfolio are generally investment grade quality, although we may invest a portion of the portfolio in higher yielding debt. Interest rate risk is viewed as the most significant risk for this asset class.

**Infrastructure**
Assets that provide essential public facilities and services such as roads, airports, seaports and power supply and generation in Australia and overseas.

**Private equity**
Investment in companies that aren’t listed on a stock exchange. These can include Australian and international companies across a wide range of industries.

**Shares (stocks, securities, equities)**
Part of a company that you can typically buy and sell on a stock exchange. You can access large and small companies across a range of industries both domestic and overseas.

**Direct Property**
Direct holdings in residential, retail, industrial or commercial real estate.

**Listed Property**
A closed-end investment company that owns assets related to real estate such as buildings, land and real estate securities. They are listed on stock market exchanges and can be traded like common shares.

**Other assets**
Investments that represent unique opportunities or strategies. Examples may include strategic equity holdings, commodities, royalties, leases and other alternative approaches.
### A snapshot of your investment options

Here’s a high level overview of your investment options, including a brief description, their risk levels over different investment time periods and where you can find more detail on the pages following.

</tr>
</tbody>
</table>

For our PreMixed options, we work out what the different mix of asset classes will be for each option. The asset allocation ranges are the minimum and maximum amounts we can invest in each asset class. Each year we set a percentage we might invest in each asset class as a guide – this is called the strategic asset allocation. During the year we can move towards or away from this percentage based on our outlook for the economy and investment markets.
When looking at the snapshots on these pages, think about:
1. how long you plan to invest for (under 5 years? 5–20 years? or over 20 years?)
2. the overall risks of that investment timeframe
3. what level of risk you’re comfortable taking with your investments.

| Estimated number of negative annual returns over any 20 year period | About 6 in every 20 years | Less than 0.5 in every 20 years | Less than 0.5 in every 20 years|

* Risk measures are based on investment portfolios with broad market exposure to Australian shares; they may differ for the individual investments you choose and your investment time frame. Risk for concentrated portfolios could be very high. The time frame recommended for holding a broad portfolio of shares, ETFs and LICs is at least 12 years.

† Cash and term deposits are exposed to the creditworthiness of the issuer and the level of interest rates.
Understanding your investment options

On the next few pages you’ll find more detail about each investment option. To help you understand what makes up each investment option, we’ve put together the example below.

Balanced

Invests in a wide range of assets, including shares, private equity, infrastructure, property, fixed interest, credit and cash. Designed to have medium to long-term growth with possible short-term fluctuations.

**Investment objective**
- To beat CPI by more than 4% pa over the medium to longer term.
- To beat the median balanced fund over the medium to longer term.

**Minimum investment timeframe**
At least 10 years.

**Risk level for the time invested**

<table>
<thead>
<tr>

</tbody>
</table>

**Estimated number of negative annual returns over any 20 year period:**
About 5 in every 20 years.

The chart shows the combination of asset classes that typically make up each option.

- **Australian shares**: 22% (10–45%)
- **International shares**: 33% (10–45%)
- **Direct property**: 7% (0–30%)
- **Infrastructure**: 13% (0–30%)
- **Private equity**: 5% (0–10%)
- **Credit**: 5% (0–20%)
- **Fixed interest**: 12% (0–25%)
- **Cash**: 3% (0–20%)
- **Other assets**: 0% (0–5%)

Check out how our investment options have done against industry and market benchmarks. See page 28 for our past performance to 31 March 2020.
Your PreMixed investment options

Choose the mix that best suits you and leave the rest to us. With our PreMixed options, we’ve done the diversification for you. These options are made up of more than one asset class and with different levels of risk and expected return.
High Growth

Invests in a wide range of assets with a focus on Australian and international shares. Designed to have strong long-term returns with possible fluctuations in the short-term.

**Investment objective**
› To beat CPI by more than 4.5% pa over the medium to longer term.
› To beat the median growth fund over the medium to longer term.

**Minimum investment timeframe**
At least 12 years.

**Risk level for the time invested**

**Estimated number of negative annual returns over any 20 year period:** About 5 in every 20 years.

* This investment option may use derivatives to efficiently manage cash flows and ensure this option is invested within the targeted asset allocation. This could result in a small economic exposure to companies that are normally excluded by the option’s investment screens (up to 5% of the total assets at any time).
### Indexed Diversified

Invests in a wide range of assets using indexing strategies. Designed to have medium to long-term growth with possible short-term fluctuations.

**Investment objective**
- To achieve an average annual return of CPI + 3% pa over the medium to longer term.

**Minimum investment timeframe**
At least 10 years.

**Risk level for the time invested**

<table>
<thead>
<tr>

Your DIY Mix investment options

Build your own mix of investment types by investing in our DIY Mix options and we’ll manage it for you.
DIY Mix investment options

**Australian Shares**
Invests in a wide range of shares in both listed and unlisted companies in Australia with a small allocation to companies in New Zealand. Designed to have strong long-term capital growth with possible short-term fluctuations in returns.

**Investment objective**
- To beat the S&P/ASX 300 Accumulation Index (adjusted for franking credits) over the medium to long term*.

**Minimum investment timeframe**
At least 12 years.

**Risk level for the time invested**
- Short-term: Very high
- Medium-term: Medium
- Long-term: Low to medium

**Estimated number of negative annual returns over any 20 year period:** About 6 in every 20 years.

**International Shares**
Invests in a wide range of companies listed on securities exchanges around the world. Designed to have strong long-term capital growth with possible short-term fluctuations in returns.

**Investment objective**
- To beat the MSCI All Country World ex Australia Index (unhedged) over the medium to long term*.

**Minimum investment timeframe**
At least 12 years.

**Risk level for the time invested**
- Short-term: Very high
- Medium-term: Medium
- Long-term: Low to medium

**Estimated number of negative annual returns over any 20 year period:** About 6 in every 20 years.

**Property**
Invests in Australian and overseas properties, including shopping centres, office buildings and industrial warehouses. Designed to have strong medium to long-term capital growth with lower volatility than shares.

**Investment objective**
- To beat CPI by more than 3% pa.
- To beat a composite of Australian and international Property Indices over the medium term, gross of investment expenses and adjusted for tax† (where applicable).

**Minimum investment timeframe**
At least 5 years.

**Risk level for the time invested**
- Short-term: High
- Medium-term: Medium to high
- Long-term: Low to medium

**Estimated number of negative annual returns over any 20 year period:** About 4 in every 20 years.

---

**Important information about the Property option**
There is a cap on how much you can invest in the Property option. AustralianSuper has the discretion to freeze switches, contributions and withdrawals into and out of the Property option for up to two years in response to a market stress event. We will notify you as soon as possible after a freeze has been imposed.

Please read the Property option – additional information at [australiansuper.com/PropertyInfo](http://australiansuper.com/PropertyInfo) for full details about the Property option.

---

* Index level returns, adjusted for implied superannuation tax (where applicable).
† The composite consists of 60% MSCI/Mercer Australia Core Wholesale Monthly Property Fund Index, 20% MSCI/AREF UK Quarterly Property Fund Index hedged to AUD and 20% NCREIF Fund Index – Open End Diversified Core Equity hedged to AUD. Hedging is performed by AustralianSuper. Prior to 1 January 2019, the benchmark was MSCI/Mercer Australia Core Wholesale Monthly Property Fund Index.
Diversified Fixed Interest

Invests in a wide range of Australian and international bonds and loans. This is done through actively investing in the fixed interest and credit asset class sectors and aims for capital stability and higher returns than cash over the short to medium term.

**Investment objective**
› To beat CPI by more than 0.5% pa over the short to medium term.

**Minimum investment timeframe**
At least 3 years.

**Risk level for the time invested**

<table>
<thead>
<tr>
<th>Short-term</th>
<th>Medium-term</th>
<th>Long-term</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medium</td>
<td>High</td>
<td>Very high</td>
</tr>
</tbody>
</table>

**Estimated number of negative annual returns over any 20 year period:** About 2 in every 20 years.

Cash

Invests in short-term money market securities and some short-term bonds. Designed to have stable returns above the official cash rate.

**Investment objective**
› To beat the return of the Bloomberg AusBond Bank Bill Index over one year*.

**Minimum investment timeframe**
At least 1 year.

**Risk level for the time invested**

<table>
<thead>
<tr>
<th>Short-term</th>
<th>Medium-term</th>
<th>Long-term</th>
</tr>
</thead>
<tbody>
<tr>
<td>Very low</td>
<td>Medium to high</td>
<td>Very high</td>
</tr>
</tbody>
</table>

**Estimated number of negative annual returns over any 20 year period:** Less than 0.5 in every 20 years.

DIY Mix investment options

- **Fixed Interest 100% (50-100%)**
- **Credit 0% (0-25%)**
- **Cash 0% (0-30%)**
- **Cash 100% (100%)**

* Index level returns adjusted for implied superannuation tax (where applicable).

Strategic asset allocations and other investment information are current as at the date of publication. The Strategic Asset Allocation, composition of individual asset classes and other investment information may change from time to time. Investment returns are not guaranteed. Updated information can be found at [australiansuper.com/AssetAllocation](http://australiansuper.com/AssetAllocation).
Member Direct

Take a hands-on approach to the way your money is invested with Member Direct, our member directed investment option.
Member Direct

The Member Direct investment option offers you more control and choice with the investment of your super or retirement income. You can invest in shares, Exchange Traded Funds (ETFs), Listed Investment Companies (LICs), term deposits and cash - all from an easy-to-use online platform.

You also get access to real-time trading, extensive market information, independent research and investment tools to help you make informed investment decisions and manage your portfolio.

This option suits members who want to be actively involved in managing their investments.

Features include:
› cash account with competitive interest rate
› S&P/ASX 300 shares, ETFs, LICs, term deposits and cash
› extensive market information and stock analysis
› consolidated portfolio reporting
› low administration and brokerage fees.

Who can invest?
To be eligible to invest in the Member Direct investment option you must be an AustralianSuper member and meet the minimum balance requirements shown below:

<table>
<thead>
<tr>
<th>Account type</th>
<th>Minimum balance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Super</td>
<td>$10,000</td>
</tr>
<tr>
<td>Choice Income</td>
<td>$50,000</td>
</tr>
</tbody>
</table>

You can only register one account (either super or Choice Income) for the Member Direct investment option at any time. Members using a TTR Income account can only invest with Member Direct in their super account.

Other important conditions
Once you open a Member Direct account, you must keep some money invested in AustralianSuper’s other investment options at all times. The minimum amount required is different for super and Choice Income accounts.

<table>
<thead>
<tr>
<th>Account type</th>
<th>Minimum balance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Super</td>
<td>$5,000</td>
</tr>
<tr>
<td>Choice Income</td>
<td>$10,000 (or 13 months of income payments, whichever is greater)</td>
</tr>
</tbody>
</table>

Income payments for Choice Income members are deducted from AustralianSuper’s other investment options. You must keep enough money in your other investment options to cover 13 months of income payments - this is called the Income payment reserve*. We will notify you if your balance is below this reserve. If your total AustralianSuper balance falls below $10,000 in Super, or $30,000 in Choice Income, you will need to close your Member Direct account and transfer any remaining funds to your other AustralianSuper investment options.

Important information
While managing your own investments increases your control and flexibility, the Member Direct investment option is not for everyone. Superannuation is a long-term investment, so this option is not suitable for members who want to ‘time’ the markets or make short-term investment decisions.

As a direct investor, you need to be aware of the risks and dangers involved, such as:
› short-term share price volatility
› the consequences of trading too often
› too little diversification and
› investing in response to your emotions.

* Your Income payment reserve counts towards your minimum balance invested in other options. So for Choice Income members the minimum balance to be invested in other investment options is $10,000, or your Income payment reserve, whichever is greater.
## How your account works

**Pre-Mixed**
Managed for you

**DIY**
Managed for you

**Member Direct**
Managed by you

### Member Direct investments

<table>
<thead>
<tr>
<th>Cash Account</th>
<th>Term Deposits</th>
<th>Shares, ETFs &amp; LICs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash Account</td>
<td>Cash Account</td>
<td>Cash Account</td>
</tr>
<tr>
<td></td>
<td>Term Deposits</td>
<td>Term Deposits</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Shares, ETFs &amp; LICs</td>
</tr>
</tbody>
</table>

To invest you will need to open a cash account, which has a competitive high interest rate.

Includes the cash account option plus you can also invest in term deposits.

Includes the first two options plus the ability to buy and sell Shares, ETFs and LICs.

### Market News, Information & Research

All the options include access to market news, information and research. Eligible members can choose to access this information without the need to open a cash account.
Other conditions
There are other conditions you must follow to keep your Member Direct investment option active. These include keeping a minimum amount of money in both your Member Direct transaction account and in our other investment options at all times as well as having limits to how much you can have invested in shares, ETFs, LICs or term deposits.
For a full list of rules that apply to this investment option, read the Member Direct terms and conditions at australiansuper.com/MemberDirect

Fees
There are fees that apply to the Member Direct investment option, these vary depending on the Member Direct investment type you’ve selected. Find out more at australiansuper.com/MemberDirectFees

Get started
1. Make sure you meet the eligibility criteria (see below)
2. Register for an online account at australiansuper.com
3. Log in to your online account and find the Member Direct tile and click ‘Access’
4. Select one of the investment options (Content, Cash account, Term deposits or Shares, ETFs & LICs)
5. Transfer the minimum balance required
6. Start investing once the money appears in your cash account (Term deposits or Shares, ETFs & LICs)

Eligibility criteria:
› be an AustralianSuper member with $10,000 or more in your super account or $50,000 or more in your Choice Income account
› have access to the internet and a current email address
› read and accept the terms and conditions.

Before you decide
You should read the Member Direct investment option guide and the Member Direct terms and conditions before making a decision. You’ll find more information at australiansuper.com/MemberDirect
Member Direct isn’t for everyone and risks can be very high, so double-check it’s right for you. You’ll be managing your own investments and will need to know a lot about investing and the markets. It’s important that you’re comfortable doing this.
We strongly encourage you to seek advice from a licensed financial adviser before choosing this option. They can help you develop an investment strategy to meet your personal circumstances and needs. To find an Adviser visit australiansuper.com/advice

Once you register for the Member Direct option
You gain access to its online platform. This is where you invest in shares, ETFs, LICs, term deposits and cash.
Useful things you should know

Here you’ll find some important information that you should also consider when choosing your investment options.

› Compare our past performance.
› Understand the investment fees and costs.
› Read how we aim to maximise returns and keep costs low.
Compare our past performance

We’ve been one of the better performing super funds over the past decade. You can keep an eye on how your investments are going by looking at our past performance.

We compare the performance of our investment options against industry and market benchmarks. Our PreMixed options are measured against other super funds in the SuperRatings Fund Crediting Rate Survey as well as the CPI. Our DIY Mix options are either measured against the relevant asset class market index or the CPI.

The following two tables show how our investment options have performed for both super/ TTR Income and Choice Income to 31 March 2020. You can also view our latest performance figures online:
› for super australiansuper.com/SuperPerformance
› for retirement income australiansuper.com/RetirementPerformance

Super and TTR Income investment options performance as at 31 March 2020

This table compares our super and TTR Income investment options against the performance benchmarks noted below. For a performance comparison of our options against their CPI-linked benchmarks visit australiansuper.com/SuperCPI

---

**You can track the performance of your investments every day**

We calculate returns for each investment option daily using crediting rates. A crediting rate is the rate of investment return paid to you on your account balance, after fees and tax. They can be positive or negative depending on investment markets. You can find out more at [australiansuper.com/factsheets](http://australiansuper.com/factsheets).

---

*Fully retired means you’ve met a full condition of release under super law.*
Understand the investment fees and costs

We’re serious about making your money last longer, which is why we keep our fees low. We can keep them low because they’re only set to cover the costs of running the fund, not to make a profit for shareholders or pay commissions to agents or advisers.

The cost to manage your investments

We work hard to keep fees down and our costs low. The overall investment fee we charge covers the cost to us of managing your money. This fee is made up of three components:

› Investment management fees – amounts deducted from your investment that relate to core investment management functions, such as audit and administrative costs.
› Performance related fees – fees we pay to external investment managers for generating positive returns.
› Transactional and operational costs – a broad category of costs we incur that relate to the buying or selling of underlying investments. Examples of these include brokerage and commission.

The overall investment fee is deducted from before-tax investment returns on 30 June – before the returns are applied to your account. This fee may change from year to year.

Investment costs for Pre-Mixed and DIY Mix investment options

Each PreMixed and DIY Mix option has its own investment costs. There may also be some differences between the costs depending on whether you’ve got your super or retirement income with us. See page 31 for these costs.

Member Direct fees and costs are different

Different fees and costs apply to our Member Direct investment option. You can find out more at australiansuper.com/MemberDirectFees

Administration fees and other fees and costs

There are other fees and costs that apply. An administration fee is charged to cover the funds administration costs.

Other fees and costs such as insurance costs, activity fees, or advice fees for personal advice may also be charged.

You should read all the information about fees and other costs in your Product Disclosure Statement because it’s important to understand their impact on your investment.

Find out more about fees and costs

Visit australiansuper.com/fees for more information on administration fees and other fees and costs.

Maximising returns, keeping costs low
This is how we do it.

Our long-term vision
We work hard to maximise investment returns over the long-term, so you can enjoy a better future. As long-term investors, we focus on investing in a mix of quality assets that can grow your savings over time.

Our core investment beliefs underpin this vision:
1. We are run only to benefit members
2. We use our scale to reduce costs and better structure investments
3. We actively manage investments where it can add value
4. We're aware of our responsibility to the broader community, consistent with our obligations to maximise benefits to members.

Investment approach
We believe an active management approach is the best way to invest. That’s why we select specific sectors, assets and stocks that we believe will outperform the broader market. This is supported by quality research, experienced investment specialists and a disciplined investment process.

We also use index managers in some options to lower overall portfolio costs or where active management opportunities are smaller.

We manage a range of asset classes internally and our goal is to do more of this over time. This strategy aims to deliver significant cost savings, which go back to you in the form of better net returns.

Our investment people
We have a range of people and teams involved at different stages of the process. Our investment governance framework ensures the appropriate checks are in place when making and implementing investment decisions, and there are clear lines of responsibility and accountability.

The Investment Committee is accountable to the Board for our investment policy and strategy. They oversee investment decisions and review asset allocation recommendations put forward by the internal team.

The internal team advises the Investment Committee on all investment matters. The team is responsible for research and portfolio management, monitoring investment managers, managing and implementing our asset allocation process and working with our external asset consultants.

A mix of internal and external investment managers select and manage the investments within each asset class – supported by a range of professional operational staff.

Currency management
Returns for international assets can be affected by the ups and downs of the exchange rate as well as changes in investment values. To help protect options that include international assets from adverse currency movements, we set a target currency exposure for these options as part of setting our strategic asset allocations every year. In addition, our currency exposure is actively managed.

Read more about how we manage currency and our foreign currency targets for the 2019/2020 Financial year financial year at australiansuper.com/HowWeInvest

Related party investments
We only make contracts and investment transactions with related parties when we believe you’ll get the same or more benefits from those investments.

Related parties might be organisations that conduct business with us, where we or one of our representatives might be a shareholder, part owner or director of that organisation or have significant influence on it. To find out more, view our latest audited financial statements available at australiansuper.com

To view AustralianSuper’s investment holdings in each option, visit australiansuper.com/WhatWeInvestIn
Environmental, social and governance management

At AustralianSuper, investing responsibly means being active on Environmental, Social and Governance (ESG) issues today, to create better long-term outcomes for members.

We believe companies and assets with good ESG management are more likely to increase their value over time. That’s why we integrate ESG considerations into all our investment decision making across all investment options.

Our ESG and Stewardship program is globally recognised and we have been awarded an A+ rating for our Overarching Approach to Responsible Investment in the United Nation’s Principles for Responsible Investment (PRI) Global Assessment Report 2019.

ESG and Stewardship Program

Integration
We consider ESG factors before we make an investment and continue doing so for as long as we keep it. We identify various ESG risks and opportunities within each asset class, and then integrate them into our investment processes and valuations for more informed decision making. We also conduct ongoing ESG management reviews for our unlisted assets.

Stewardship
We actively engage with companies on ESG issues and communicate our long-term investment interests to them. Direct engagement enables us to influence the make-up of company boards and encourage positive behaviour on issues that can impact members’ retirement outcomes.

We also influence ESG issues by voting on company and shareholder resolutions for:

› S&P/ASX200 companies
› any other Australian listed company that we’re a substantial shareholder in
› most international listed companies
› all Australian companies held internally.

Choice
Many members have different values, so it’s important we consider these preferences in our investment options. For members who want to avoid investing in industries and companies that don’t align with their values, we offer the Socially Aware (see right) and Member Direct options detailed on page 24.

Collaboration
We believe we can make a bigger, more lasting impact by working with companies and other asset owners for positive change. AustralianSuper collaborates on a number of investor initiatives like Climate Action 100+, United Nation’s Principles for Responsible Investment (UNPRI), the Investor Group on Climate Change (IGCC) and the Australian Council of Superannuation Investors (ACSI).

You can view our quarterly voting history and read more about our ESG and Stewardship Program at australiansuper.com/ResponsibleInvestment

Tobacco exclusion
AustralianSuper excludes companies that manufacture tobacco products from its investment options. Tobacco is a unique investment, due to its particular characteristics and the damage it causes. There is no safe level of consumption; it’s highly addictive and it’s the largest preventable cause of death in the world. These factors make investing in tobacco inconsistent with our purpose of helping members achieve their best possible retirement outcomes.

This exclusion doesn’t apply to the use of derivatives that have an indirect exposure to tobacco, or to ETFs and LICs in Member Direct.

Socially Aware option
Socially Aware invests using strict screening based on environmental, social and governance standards. It doesn’t invest in listed shares or fixed interest securities of Australian or international companies that:

› directly own fossil fuel or uranium reserves*
› produce tobacco, cluster munitions or land mines
› have single gender boards (for ASX 200 companies)
› have been flagged as having human rights, labour, environmental or governance controversies.

Socially Aware removes investment in companies that own fossil fuel or uranium reserves regardless of the size of their ownership. We believe this is the simplest, most transparent way of removing these investments at their source while enabling the option to meet its investment return objectives.

You can find out more about the asset allocation and risk profile of our Socially Aware option on page 18.

* Reserves, in this context, are thermal coal, oil, gas or uranium that can be extracted from known fields at an economical cost.
Making your investment choice

Whether you’ve already made up your mind about what investment options will suit you or you’re still deciding, we can help you take the next steps, including:
› how to choose your investment options
› how to change your options
› where to get help and advice.
How to make your choice
The easiest way to make your investment choice is online.
1. Log into your online account at australiansuper.com/login and select ‘Manage my account’ and then ‘Change my investments’.
2. If you can’t make your choice online, that’s fine, just call us on 1300 300 273 between 8am and 8pm AEST/AEDT weekdays.
When you join, if you don’t make a choice at all, we invest your money in our Balanced option, which is our default option. You can also make and change investment choices after you become a member.

How to change your investment options
You can change how you invest your account up to once a day (except weekends and national public holidays*).
If we receive your request before 4pm AEST/AEDT weekdays, we’ll invest your account in your new choice the next business day and it will show in your account the following business day. If we receive your request on or after 4pm AEST/AEDT weekdays, or on weekends or public holidays, the change will take an extra business day.
Find out more about choosing or changing your investment options at australiansuper.com/switching

Consider getting some professional financial advice
AustralianSuper members have access to a range of financial advice and support options to help them make an informed investment choice. Here’s how we can help:

Online
Contact us through Live Chat at australiansuper.com or via our app for general information about your super. Or to check out our series of online calculators to help you plan for a better future, visit australiansuper.com/calculators
Or if you’re simply after some more information on our advice options, visit australiansuper.com/advice

Simple†
Call us on 1300 300 273 and ask to speak with a member of the advice team for a Super Health Check, or for simple, personal advice on:
› making an investment choice
› adding extra to your super
› transition to retirement and account based pension options
› sorting your insurance.

Comprehensive†
For broader advice, meeting face-to-face with an adviser can help when you want a detailed financial plan and have a number of financial matters to think about. And where available, you have the option to meet with an adviser using a secure video link from the comfort of your own home.
Arrange an appointment at australiansuper.com/find-an-adviser

Webinars
Our webinars are an easy way to learn about managing your super or planning for retirement. You can access our webinars from the comfort of your own home.
Register at australiansuper.com/webinars

* Plus Queen’s Birthday (all states, except Queensland and Western Australia).
† The financial advice you receive will be provided under the Australian Financial Services Licence held by a third party and not by AustralianSuper Pty Ltd (AustralianSuper) and therefore is not the responsibility of AustralianSuper. With your approval a fee may be charged if a Statement of Advice is provided.
Start investing in your future.

Once you’ve decided which investment options best suit you, making your investment choice is easy.
