Follow these simple steps to change your financial future for the better.

1. **Choose**
   Choosing a super fund that puts members’ profits before its own is a great place to start, so make sure you choose wisely. To compare us with other funds, go to [australiansuper.com/compare-us](http://australiansuper.com/compare-us).

2. **Consolidate**
   You may be wasting money on fees by holding lots of low balance accounts across a number of funds. It’s easy to combine your other accounts into AustralianSuper* – learn more or get started at [australiansuper.com/consolidate](http://australiansuper.com/consolidate) or [my.gov.au](http://my.gov.au). We can help you find your lost super too – visit [australiansuper.com/LostSuper](http://australiansuper.com/LostSuper).

3. **Contribute more**
   Consider adding a little extra to your super, as it could make a big difference to your final balance†. These extra contributions compound every year. Contributing via salary sacrifice could save you money because it’s taxed at 15% rather than up to 45%.

4. **Check insurance**
   Most super funds offer cost effective default insurance for death and permanent or temporary disablement. It’s worthwhile checking if you have adequate cover, need additional cover or if you’re paying for premiums you’re not aware of.

5. **Continue with your Fund**
   Even if you switch jobs or retire, selecting a good fund right from the start is a wise choice, and it’s worth considering continuing with it if they’re providing strong long term returns with relatively low fees.
