Page 33: Additional costs that aren't included in the Investment fee

Changes are in **orange** below.

Some of our Transactional and operational costs are included in the calculation of our overall Investment fee, but there are other Transactional and operational costs which aren't included. The costs we don't include are costs we can't specifically identify. These are built into (or 'implicit' in) the trading prices of assets and therefore can only be estimated. These costs are known as Implicit transactional and operational costs. You can find the definition of Implicit transactional and operational costs, plus some examples of these, on page 35 of the PDS.

The table on this page shows the amounts as a percentage of the balance held in the investment option for the 2021/2022 financial year for both the included Transactional and operational costs and the implicit items, so you can see an indicative total figure for all Transactional and operational costs.

Investment Option	Transactional and Operational Costs* (Included in Investment fee)	Implicit Transactional and Operational Costs (not included in Investment fee)	TOTAL Transactional and Operational Costs
High Growth	0.16%	0.12%	0.28%
