The Member Direct investment option offers you more control and choice with the investment of your super or retirement income.
About this guide

For a complete picture of the investment options available to you with AustralianSuper, this guide should be read in conjunction with our *Investment Guide* available at [australiansuper.com/InvestmentGuide](http://australiansuper.com/InvestmentGuide) and the Member Direct investment option Terms and Conditions available at [australiansuper.com/MemberDirectTCs](http://australiansuper.com/MemberDirectTCs)

The information in this guide is current at the time of issue and is subject to change. For the most up-to-date information on this option, please visit [australiansuper.com/MemberDirect](http://australiansuper.com/MemberDirect)
Welcome to the Member Direct investment option

Through the Member Direct investment option you can invest in shares, Exchange Traded Funds (ETFs), Listed Investment Companies (LICs), term deposits and cash – all from an easy-to-use online platform.
The Member Direct investment option offers you more control and choice with the investment of your super or retirement income. You can invest in shares, Exchange Traded Funds (ETFs), Listed Investment Companies (LICs), term deposits and cash – all from an easy-to-use online platform.

You also get access to real-time trading, extensive market information, independent research and investment tools to help you make informed investment decisions and manage your portfolio.

This option suits members who want to be actively involved in managing their investments.

Features include:
- cash account with a competitive interest rate
- S&P/ASX 300 shares, ETFs, LICs, term deposits and cash
- extensive market information and stock analysis
- consolidated portfolio reporting
- low administration and brokerage fees.

**Other important conditions**

Once you open a Member Direct account, you must keep some money invested in AustralianSuper’s other investment options at all times. The minimum amount required is different for super and Choice Income accounts.

<table>
<thead>
<tr>
<th>Account type</th>
<th>Minimum ongoing balance in PreMixed or DIY Mix investment options (i.e. excluding Member Direct)</th>
<th>Minimum ongoing balance across all investment options (i.e. including Member Direct)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Super</td>
<td>$5,000</td>
<td>$10,000</td>
</tr>
<tr>
<td>Choice Income</td>
<td>$10,000 (or 13 months of income payments, whichever is greater)</td>
<td>$30,000</td>
</tr>
</tbody>
</table>

If you don’t meet the minimum ongoing balance requirements you’ll need to re-balance and/or close your account:
- If your total balance in PreMixed and DIY Mix options (excluding Member Direct) falls below the minimum ongoing requirement of $5,000 in super or $10,000 (or 13 months of income payments, whichever is greater) in Choice Income, you will need to re-balance your investments.
- If your total balance across all investment options (i.e. in PreMixed, DIY Mix and Member Direct) falls below the minimum ongoing requirements of $10,000 in super or $30,000 in Choice Income, you will need to close your Member Direct account and transfer any remaining funds to your other investment options.

Income payments for Choice Income members are deducted from AustralianSuper’s other investment options. You must keep enough money in your other investment options to cover 13 months of income payments – this is called the Income payment reserve*. We will notify you if your balance is below this reserve.

Who can invest?

To be eligible to invest in the Member Direct investment option you must:
- be a current AustralianSuper member, and
- register for an online account with AustralianSuper, and
- have a minimum account balance, across all AustralianSuper investment options, as shown below.

<table>
<thead>
<tr>
<th>Account type</th>
<th>Minimum balance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Super</td>
<td>$10,000</td>
</tr>
<tr>
<td>Choice Income</td>
<td>$50,000</td>
</tr>
</tbody>
</table>

You can only register one account (either super or Choice Income) for the Member Direct investment option at any time. Members using a TTR Income account can only invest in Member Direct with their super account.

We may change or add to the selection of investments available through the Member Direct option over time.

For the current Investment menu, visit australiansuper.com/MemberDirect

---

* Your Income payment reserve counts towards your minimum balance invested in other options. So for Choice Income members the minimum balance to be invested in other investment options is $10,000, or your income payment reserve, whichever is greater.
Features of the Member Direct investment option

The Member Direct investment option gives you access to a cash account, real time trading in shares, Exchange Traded Funds (ETFs) and Listed Investment Companies (LICs), plus a selection of term deposits – all from an easy-to-use online platform. Member Direct also includes extensive market and company research and investment tools to help you keep track of your investments.

A cost effective alternative

The Member Direct investment option offers a cost-effective alternative for members who are interested in the self managed approach to saving for retirement. It offers:

› **Control and flexibility:** it enables you to tailor your investment strategy by combining the shares, ETFs, LICs, term deposits and cash you choose yourself with investments managed for you in AustralianSuper’s other investment options.

› **Less paperwork:** with the Member Direct option, AustralianSuper takes care of all the administration, compliance and reporting requirements, so you don’t have to.

› **Lower costs:** one of the major advantages of the Member Direct option is that there are no set-up charges and ongoing fees are low.

To find out more about fees and charges for the Member Direct option see page 8.

An alternative to an ATO regulated fund

Data from the ATO’s most recent report shows that the average expense ratios for SMSFs decline in direct proportion to increase in SMSF fund size. For SMSFs with balances under $200,000, the reported average return on assets was negative (refer to table).

This table shows the average annual operating expenses and average return on assets for SMSFs by fund size in 2017.

<td>0.16%</td>
</tr>
<tr>
<td>$50,001 +</td>
<td>0.12%</td>
</tr>
</tbody>
</table>

Brokerage fees are subject of Goods & Services Tax (GST) at the rate of 10%. A refund for the Reduced Input Tax credit RITC (typically 75% of the GST paid) will be credited to your account at the time of settlement e.g. brokerage fees of $15.00 are subject of GST of $1.50. Your account will be credited 75% of the GST paid i.e. $1.13

Seek professional advice

Investments purchased through the Member Direct investment option form part of a self-directed investment strategy. Member Direct isn’t for everyone and risks can be very high.

As a direct investor, you need to be aware of the risks and dangers involved, such as:

› short-term share price volatility
› the consequences of trading too often
› too little diversification and
› investing in response to your emotions.

We strongly encourage you to seek advice from a financial adviser before choosing the Member Direct investment option and formulating your investment strategy.

For more information on your advice options† with AustralianSuper call 1300 300 273 between 8am to 8pm (AEST/AEDT) weekdays or visit australiansuper.com/advice

Fees for ETFs and LICs

Additional fees and costs incurred by the ETF or LIC, including management fees, custody costs and other expenses may be deducted from the returns of the underlying securities in the ETF or LIC. For details please visit the website of the ETF or LIC issuer. Visit australiansuper.com/MemberDirect for a copy of the Member Direct investment option – investment menu, which provides a full list of the available ETFs and LICs offered.

* All fees are GST inclusive. They are calculated daily and automatically deducted from your cash account on the first business day of each month.
† The PAF is determined by the option you select and not by the type of assets you hold. If you no longer hold the core asset type in Member Direct, e.g. you’re in the Term Deposits option and don’t hold Term Deposits or you’re in the Shares & ETFs option and don’t hold shares/ETFs/LICs, you can reduce the PAF you pay by moving to a lower fee option. To do this you must change your option online.
‡ The financial advice you receive will be provided under the Australian Financial Services Licence of third parties and not by AustralianSuper Pty Ltd (AustralianSuper) and therefore is not the responsibility of AustralianSuper.
How your account works

You need to register and open a cash account to invest in shares, ETFs, LICs, term deposits and cash and change your other AustralianSuper investment options.
Your cash account

To start investing in Member Direct, you need to open a cash account and transfer a minimum of $400 into your cash account. This is used to cover your Portfolio Administration Fee.

You transfer the funds you want to invest in the Member Direct option from your other AustralianSuper investment options – you must keep the specified minimum amount in your other AustralianSuper investment options (see Other important conditions on page 6).

You can start investing once your funds are available in your Member Direct cash account. You’ll need to make sure you have enough money to cover your trade (including any brokerage). Member Direct will automatically calculate and display your available cash when you start a transaction.

All investment income such as interest and dividends not being reinvested through a dividend reinvestment plan, proceeds from investment sales and cash transfers from your other AustralianSuper investment options are deposited into your cash account. Fees, tax payments (if applicable), investment purchases and cash transfers to your other AustralianSuper investment options are deducted from your cash account.

For more information about dividend reinvestment plans, see page 12.

Earn a competitive interest rate

The cash account offers a competitive interest rate. Interest is accrued daily and credited to your cash account monthly (in arrears). The cash account interest rate can fluctuate – for current rates visit australiansuper.com/MemberDirect

Your cash account – the hub of the Member Direct investment option

Your cash account operates like an online bank account. It offers a competitive interest rate and you can use the funds in it to invest in shares, ETFs, LICs and term deposits.

To invest you will need to open a cash account, which has a competitive high interest rate.

Includes the cash account option plus you can also invest in term deposits.

Includes the first two options plus the ability to buy and sell shares, ETFs and LICs.

Market News, Information & Research

All the options include access to market news, information and research. Eligible members can choose to access this information without the need to open a cash account.
Transacting on Member Direct

Making cash transfers to and from Cash account
You can transfer cash into the Member Direct cash account once every business day.
You can also transfer cash from the Member Direct investment option into your other AustralianSuper options. How cash transfers are applied to your other AustralianSuper investments depends on the type of account you have.

› Super account: Cash transfers into the Member Direct option come out of your other investment options according to how your existing account balance is invested. Cash transfers out of the Member Direct investment option are invested according to your investment choice for new contributions to your account.

› Choice Income account: Cash transfers in and out of the Member Direct investment option are withdrawn from or credited to your other investment options in the same proportion as your existing balance is invested.

Cash transfers are settled on a ‘T+2’ basis. This means your transfer is settled on the second business day after it is requested. Your cash will be available in your account two business days after you make the request.

The request cycle runs from 4pm AEST/AEDT each business day until 3.59pm AEST/AEDT the following business day. Requests placed on or after 4pm AEST/AEDT will take an extra business day.

You can view any pending cash transfers under the ‘pending’ tab in the ‘Transact/Cash transfer’ section. You can cancel a pending cash transfer request before 4pm AEST/AEDT.

Investing in term deposits
You can invest in term deposits once a week. If we receive your request before 11.59pm AEST/AEDT on a Thursday your account will be invested on Friday (or the next business day if it is a public holiday). If your request is received after this time it will take effect from the following Friday.

You can cancel your request at any time before 11.59pm AEST/AEDT on Thursday. After this time your request cannot be cancelled. You can view any pending term deposit orders on Member Direct in the ‘pending’ tab, which is located under ‘Transact/Term deposits’.

Trading in shares, ETFs and LICs
You can buy and sell shares, ETFs and LICs at any time during the ASX trading day. You can also check live stock prices on the order pad when you are placing your trade.

You can place a buy or sell order for listed securities at the market price or set a price limit. An ‘at market’ order will be placed at the current market price. When you select ‘limit’ you can set the maximum price you are willing to pay for a security or the minimum price you are willing to sell it for.

Trades in shares, ETFs and LICs are executed immediately. Member Direct will automatically check you have sufficient funds in your cash account to settle your trade. Your available cash and brokerage costs are displayed on the order pad where you place your trade. The platform also checks your investment is within the minimum and maximum limits (see page 6) before submitting your order to our broker to put to market. We reserve the funds in your cash account to cover the trade plus brokerage costs until your order is either settled or cancelled.

Trades are settled on a ‘T+2’ basis. This means your trade is settled on the second business day after it is requested. When you place a sale the funds will immediately be included in your available balance. This is known as a ‘good value’ transaction.

Changing your AustralianSuper investment choices
You can change how your balance is invested in PreMixed and DIY investments through your account online. You do this by making an investment switch.

We will only process one investment switch request each business day. The request cycle runs from 4pm AEST/AEDT each business day until 3.59pm AEST/AEDT the following business day. If you place your investment switch request before 4pm AEST/AEDT on a business day your account will be invested in your new investment choice the next business day. Your new investment choice will appear in your account the following business day.

Requests placed on or after 4pm AEST/AEDT will take an extra business day.
You can’t make an investment switch and cash transfer at the same time
Different processing times will apply depending on whether you make your investment switch or cash transfer first.

Making an investment switch first
If you request an investment switch before 4pm AEST/AEDT on a business day you can place a cash transfer request after 4pm AEST/AEDT on the next business day.

Making a cash transfer first
If you request a cash transfer before 4pm AEST/AEDT on a business day you can place an investment switch after 4pm AEST/AEDT on the same business day.

Cancelling your request
If you want to cancel your pending investment switch or cash transfer request, you’ll need to do it before 4pm AEST/AEDT on the business day that you made the request. You can then place a new request.

When is my investment switch or cash transfer effective?
When you request an investment switch or a cash transfer before 4pm AEST/AEDT on a business day, your transfer will show in your account two business days later. The investment switch is invested the business day after the request. The cash transfer is invested two business days after the request. To find out more about choosing or changing your investment options in Member Direct visit australiansuper.com/switching

Dividend Reinvestment Plans
A Dividend Reinvestment Plan (DRP) automatically reinvests dividends to buy more shares or ETFs. Alternatively, you can have your dividends paid into your cash account as cash.

You can choose to participate in a DRP for each stock you hold that offers this option. The Member Direct investment option gives you the flexibility to change your DRP preference at anytime, for all stocks in your portfolio, or on a stock by stock basis.

Reinvesting your dividends in shares, ETFs and LICs under a DRP usually results in a small cash residual as entitlements are allocated as whole shares. AustralianSuper pays any residual cash amounts and associated franking credits into your cash account.

Depending upon the DRP election you have made, and the relevant DRP plan rules, changes in your listed security holding may affect the portion of your holding participating in a DRP for any given dividend or distribution. You should review your DRP election following any increase or decrease in your listed security holding.

Corporate actions
A corporate action is an action taken by a publicly listed company relating to its securities. Frequently, corporate actions provide investors with different options so each investor can elect the option they believe is best suited to their personal circumstances (an ‘elective’ corporate action). Other corporate actions simply occur (these are called ‘mandatory’ corporate actions).

When a listed security you hold through the Member Direct investment option is affected by a corporate action, AustralianSuper reviews the corporate action and in most cases allows you to make an election in relation to that action. We will send you an alert through Member Direct and an email detailing any corporate actions that you can elect to participate in. An example is share buybacks.

Corporate actions such as voting at Annual General and Extraordinary Meetings are not available through the Member Direct investment option. Furthermore, within Member Direct, members are not able to participate in Class Actions as they do not directly own the investment.

Constructing your AustralianSuper portfolio

The Member Direct investment option is AustralianSuper’s self-managed investment option. It enables you to combine investments in shares, ETFs, LICs, term deposits and cash with AustralianSuper’s other investment options to achieve your desired investment strategy.
The right investment strategy for you will depend on your investment objectives, risk profile and circumstances. The level of control you want to have over how and where your super is invested is also an important consideration.

A professional financial adviser can help you decide the right options for you.

Once you invest in the Member Direct investment option you must keep the specified minimum amount in one or more of AustralianSuper’s other investment options. See Other important conditions on page 6.

Your AustralianSuper investment options
With AustralianSuper you can decide how hands-on you want to be with your investments.

Invest your own portfolio
Member Direct options include cash, term deposits, shares, ETFs and LICs, which you choose yourself. It offers the most flexibility and control of all AustralianSuper options.

Build your own strategy
DIY Mix options are single asset class portfolios. You choose how much you want to invest in each in a mix that can also include one or more PreMixed options.

We use a combination of internal and external professional fund managers to manage your portfolio.

Choose your option and leave it to us
PreMixed options are diversified options that invest across different combinations of asset classes such as shares, property, infrastructure, fixed interest and cash.

We use a combination of internal and external professional fund managers to manage your portfolio.

Please read this Guide in conjunction with AustralianSuper’s Investment Guide, available at australiansuper.com/InvestmentGuide
Remember that super and retirement income are long-term investment strategies

Your investments will impact how much super you have and how long your savings will last in retirement. Here are a few pointers to help you invest for the long term.

**Make a plan and stick to it**
People who manage their own investments can sometimes become too emotionally involved in them. Emotions such as greed and fear can lead to investors making irrational short-term decisions that have negative results. It’s important for investors to remember that super is a long-term investment and saving vehicle for your retirement. A professional financial adviser can help you develop a long-term plan and stick to it.

**Understand the investment risks**
All styles of investment have a number of inherent risks, which can change over time. Make sure you understand how different risks can impact your retirement savings over different investment timeframes.

The balance between your level of comfort with risk and your desire for returns is the key to selecting the investments in your portfolio. For more information on investment risks, read the *Investment Guide* available at [australiansuper.com/InvestmentGuide](http://australiansuper.com/InvestmentGuide).

**Diversify**
Investing in a range of securities, sectors and asset classes spreads your risk and means you don’t have to rely on the returns of a few investments.

Different investments perform better at different times. By following a diversified strategy, your better performing investments can help to offset your investments that aren’t performing so well. While this strategy can reduce some of the highs, it can also reduce the lows and provide more consistent investment returns.

**Market timing and trading too often can be costly**
Actively trying to ‘time the market’ can be counter productive. Selling when a share has dropped in value, for example, and missing just a few days of its rebound can make a large difference to your super balance on retirement. It is ‘time in the market’ that makes the difference over the long term.

Also, while trading in real time is a flexible and convenient way to invest, trading too often can result in increased brokerage costs and tax, which can impact long-term returns.

**Invest for long-term growth**
One mistake many direct investors make is to invest a large percentage of their portfolio in low-return assets like cash during periods of volatility. While this strategy may suit investors requiring short-term access to their funds it can erode long-term growth. Investors whose super and subsequently their retirement income will be invested for many years or decades may need to consider including assets that can outperform inflation and deliver long-term growth.

**Short versus long-term investing in Australian shares**
Investing for longer periods evens out short-term peaks and troughs in investment returns.

This graph compares Australian sharemarket returns over rolling one year and ten year periods from June 1996 to March 2019. The orange line shows how volatile the sharemarket can be from year to year. The purple line shows how a longer investment time frame can smooth out the sharemarket’s highs and lows.

  › Maximum investment in a single term deposit is $5 million | › Minimum balance of $400 | |
| **Investment timeframe** | See the information below for the risk levels that correspond to your investment timeframe | |  |
| **Risk levels for the time invested** | **Short-term** (< 5 years) | Very high | Very low | Very low |
| **Medium-term** (5 to 20 years) | Medium to high | Medium to high | Medium to high | |
| **Long-term** (> 20 years) | Medium | Very high | Very high | |
| **Expected frequency of negative annual return** | About 6 in every 20 years | Not expected§ | Not expected§ | |

* Risk measures for shares, ETFs & LICs are based on investment portfolios with broad market exposure to Australian shares, they may differ for the individual investments you choose and your investment time frame. Risk for concentrated portfolios could be very high. The time frame recommended for holding a broad portfolio of shares, ETFs & LICs is at least 12 years.

† See Other important conditions on page 6.

‡ The maximum amount you can invest in a single ETF or LIC may vary according to the type you invest in.

§ Whilst cash and term deposits are not expected to have negative returns, investments remain exposed to the creditworthiness of the issuer.

---

**About these objectives and risk levels**

The objectives and risk levels shown in this table for shares, ETFs and LICs are based on investment portfolios with broad market exposure. These may be different for the individual investments you choose. Different investments have different risks over different timeframes. In the above table:

- **Short-term risk** is the risk that your super savings will be reduced by volatility of investment markets and is the same as the Standard Risk Measure, which is used across the super industry and is based on the likelihood of negative returns in a given year.

- **Medium-term risk** balances two risks. The first is that your super savings will be reduced by volatility and the second is that your super savings will not keep up with inflation.

- **Long-term risk** is the risk that your super savings will not keep up with inflation.

More information on risks and your investment timeframe is available at [australiansuper.com/RiskLevels](http://australiansuper.com/RiskLevels).

**Investment menu**

The approved investments may change over time. You can view the current investment menu at [australiansuper.com/MemberDirect](http://australiansuper.com/MemberDirect).
Shares
Direct access to S&P/ASX 300

The Member Direct investment option includes shares in the S&P/ASX 300 Index, which comprises the top 300 companies listed on the Australian Securities Exchange (ASX) by size (called market capitalisation). This means you can access Australia’s most well-known companies and some of the smaller ‘niche’ companies in a range of industries. The Index may also include trusts (which pay trust distributions rather than dividends).

We may add other listed securities to the Investment menu over time. You can view the shares in the S&P/ASX 300 Index on Member Direct. You can view the approved list of investments at australiansuper.com/MemberDirect

Benefits and risks of investing in shares
Investing in shares gives you the opportunity to participate in the future profits and growth of Australian companies. Other benefits include:

› High long-term return potential: shares have historically earned higher returns than other asset classes over longer periods.
› Tax-effective income: shares can provide tax benefits to shareholders in the form of franking credits (also known as imputation credits). Any franking credits received by the Fund are credited back to members’ accounts and can help to improve net investment returns. Please see page 28 for further details.
› Liquidity: Listed shares can be easily bought and sold on the ASX, making them a liquid investment

Risks include:

› Volatility: Share prices can be volatile over the short term.
› Lack of diversification: Direct share investors often fail to diversify adequately, which can increase volatility. You can increase diversification by investing in a variety of stocks across different industries or investing in ETFs, LICs or one or more of AustralianSuper’s other investment options.
› Market timing: Investors often try to pick the top and bottom of the market to maximise returns. Getting these decisions wrong can impact long-term returns.

Selecting stocks on Member Direct
With the Member Direct option you can research, select and track stocks. Member Direct includes extensive market and company research to help you analyse companies, and tools to keep track of your portfolio.

Features include:

› your portfolio details, including a consolidated view of your AustralianSuper investment options and asset allocation
› share prices live and 20-minute delayed quotes
› data and commentary from Australian and international markets to local industries and companies
› independent analysis and recommendations for Australian companies
› watchlists to keep an eye on the stocks you’re interested in, and those already in your portfolio
› actions and alerts to let you know of corporate actions, dividend announcements and other important information.

Changes to stocks in the S&P/ASX 300 Index
The stocks included in the S&P/ASX 300 Index change over time. If you own shares in a stock that has been removed from the Index, you can retain the shares and sell them at any time, but you will not be able to buy more shares in that stock.

Occasionally AustralianSuper may exclude stocks with certain structures — for example, a partially-paid security. Any exclusions will be noted on Member Direct.
Exchange Traded Funds
Invest in local and international sharemarkets in a single trade

The Member Direct investment option gives you access to a wide range of Exchange Traded Funds (ETFs) from different providers. You can view the current investment menu on Member Direct and at australiansuper.com/MemberDirect

What are ETFs?
ETFs are traded on an exchange like a stock but are structured like a traditional managed fund. ETFs contain a collection of securities and usually represent a particular market index (eg. the S&P/ASX Small Ordinaries Index).

ETFs provide a low cost way to access a wide range of securities in Australian and international markets and different industry sectors without you having to select the stocks yourself.

How ETFs work
ETFs are constructed with reference to a specific index, like the S&P/ASX Small Ordinaries Index. The ETF portfolio will hold similar securities and weightings to the index, so it can closely replicate its performance. Market participants ensure ETFs trade at prices that are closely aligned to the net asset value of the underlying securities in the portfolio.

Like shares, you can buy and sell ETFs at any time during the trading day through the Member Direct option.

Benefits and risks of investing in ETFs
ETFs can provide a range of benefits for long-term super investors. These include:

▶ Diversification: ETFs provide instant exposure to a diversified portfolio of securities. Diversification reduces concentration risk in a portfolio.
▶ Cost effective: ETFs are a cost-effective way to invest in a diversified basket of stocks. ETF fees are generally lower than those of managed funds. Brokerage does apply.
▶ Flexibility: you can buy and sell ETFs any time during the trading day at market prices.
▶ Transparency: ETFs are listed on a securities exchange with market prices quoted throughout the trading day and portfolio holdings are published regularly so you know exactly what you own.
▶ Liquidity: as ETFs are traded on a securities exchange like shares they are easy to buy and sell.

While ETFs offer diversification, which can reduce risk, they are still subject to market risk. Investment markets can be volatile and investment values can rise and fall. The level of risk will depend on the types of securities held in the ETFs’ underlying portfolio. For example, shares have a higher risk level over shorter time periods but offer the potential for higher long-term returns.
Listed Investment Companies

Invest in a diversified portfolio managed by investment professionals for the long-term

The Member Direct investment option gives you access to a selection of Listed Investment Companies (LICs). You can view the current investment menu on Member Direct at aussiesuper.com/MemberDirect

What are LICs?
LICs are listed companies that invest in other companies with the purpose of giving its investors exposure to a variety of shares through its investment portfolio. An investment in a single LIC can provide investors with an exposure to multiple underlying companies, in some cases more than 100, across a range of industries.

How are ETFs and LICs different?
The primary difference between LICs and ETFs (refer to page 18) is that an ETF tracks the performance of a specific index, while the LIC manager seeks to outperform the index through actively managing the portfolio of investments.

Another difference is that LICs are close-ended funds with a fixed number of issued shares; in contrast ETFs are open-ended. This means that unlike ETFs, LICs are not directly exposed to capital inflows or redemptions by investors. Investors of LICs can buy and sell on the exchange without affecting the underlying portfolio. In contrast, ETFs are directly exposed to capital inflows and outflows.

Benefits and risks of investing in LICs
LICs can provide long-term investors a range of benefits, including:

- **Managed by investment professionals**: LICs are managed by full-time investment managers who seek to optimise the long-term return on the investment portfolio.
- **Diversification**: LICs can provide cost-effective exposure to a diversified portfolio of securities (mainly stocks) reducing the concentration risk in a portfolio.
- **Cost effective**: LICs can be a cost-effective way to invest in a diversified basket of stocks. The Management Expense Ratios (MER) are generally lower than those of managed funds. Brokerage fees apply when buying and selling LICs.
- **Liquidity**: LICs are traded on a securities exchange like shares and the larger LICs are easy to buy and sell.
- **Consistent dividend distributions**: LICs are structured as companies and usually distribute their income by way of fully franked dividends, on which generally 30% company tax is already paid.

There are also a number of risks when investing in LICs, including:

- **Volatility**: LICs are prone to the overall volatility of the stock market.
- **Pricing dynamics**: LICs trade at a premium or a discount to their Net Tangible Assets (NTA). This can have a major impact on the actual investor return experience over both the short and long term.
- **Governance**: Transparency on smaller/newer LICs can be poor and their investment mandates can be very flexible and/or allow esoteric investments, leading to unusual return and risk outcomes for investors.
Term deposits
A choice of issuers, interest rates and terms

The Member Direct option offers a selection of term deposits from different issuers. You can view the current list of term deposits on Member Direct and at australiansuper.com/MemberDirect.

These investments have a locked-in term and interest rate, which is accrued daily. The interest rate is generally higher than a normal bank deposit interest rate. You can also automatically rollover your term deposit when it matures with same term and issuer or best rate options available.

Interest rates
Term deposit rates are reviewed each week and published on Member Direct.

You can also view the interest rate ranges at australiansuper.com/MemberDirect. Please note published rates are gross of tax.

The interest plus invested capital is credited to your Member Direct cash account at maturity. If you set up an automatic term deposit re-investment, the net proceeds from your maturing term deposit are first credited to you cash account and then invested in the next available term deposit.

Benefits and risks of investing in term deposits
Term deposits offer:
› stable investment returns
› a set interest rate for the life of the investment
› no investment management or brokerage fees
› competitive interest rates.

As the term plus the interest rate are fixed when you purchase a term deposit, and these types of investments are highly regulated, term deposits have a low risk level when used as a short-term investment. You are unlikely to lose your capital, and you know exactly what return you will receive on your investment over the set period. While it is unlikely you will lose money from a term deposit there is an opportunity cost of locking in an interest rate. Interest rates can fluctuate so you could potentially miss out on a higher interest rate if interest rates rise during the term of your term deposit. Term deposits also have a higher risk level over longer investment timeframes, as they may not keep ahead of inflation. Term deposits are considered ‘illiquid’ investments, because once you have agreed on a term, you cannot redeem your cash earlier without incurring penalty interest.

Financial Claims Scheme
Term deposits available through the Member Direct investment option are not covered by the Government’s Financial Claims Scheme (FCS).

 Redeeming term deposits before maturity
You can only break your term deposit early if you are a Choice Income member or you meet a superannuation condition of release. For details of the conditions of release visit australiansuper.com/AccessSuper.

If you (or your beneficiaries) redeem your term deposit(s) prior to the maturity date, the interest rate will be reduced. Interest rate reductions can vary for different providers and the time invested. For details see the current Member Direct investment menu available at australiansuper.com/MemberDirect.
Member Direct platform

You can buy and sell shares, ETFs and LICs in real time, invest in term deposits and cash and switch between your AustralianSuper investment options. Member Direct has all the information and tools you need to stay on top of your portfolio.
Cover stories

Cover stories is a newsfeed, where front page news and research is kept. It will form part of your Member Direct homepage. The newsfeed contains articles that you’re able to customise from AustralianSuper, UBS research and Morningstar Australasia.

Actions and alerts

Actions and alerts is your inbox where we will communicate any corporate actions or other important account information to you.

Homepage

This is the main menu on each page.

Portfolio drawer

A portfolio snapshot on every page lets you see all your balances in AustralianSuper and the Member Direct option at a glance.

It consolidates your Member Direct investments and other AustralianSuper investment options so you can view a breakdown of your entire portfolio.

To see your portfolio in more detail, click on the your balance to open the portfolio drawer.

Investment cards

Displays your individual portfolio holdings in detail. You can interact with each card to turn them over and see the current market price and market movement for today.
Manage my account

In this section you can complete transactions, view transaction histories and download reports.

Reports include:

1. **Cash transaction report:**
   Details cash account for a specific date range.

2. **Dividend report:**
   Details dividends paid on your share portfolio for a specific date range. Includes unfranked and franked dividend income, franking credits, tax withheld and net dividend income.

3. **Portfolio valuation report:**
   Breakdown of the current valuations of your cash, term deposits, shares, ETFs, LICs and other investment options. Also includes a consolidated valuation of your entire portfolio.

4. **Fees and expenses report:**
   Details fees and expenses such as administration fees, brokerage and data services for a specified date range.

5. **Unrealised capital gains and tax report:**
   Details unrealised capital gains and capital losses for your share portfolio for financial year periods.

6. **Capital gains disposal and tax report:**
   Details realised capital gains and unused realised capital losses on share sales for financial year periods.
**Explore**

In this section you can discover and read content related to investments and create your own customised information.

**Member Direct includes:**

- UBS Research and commentary which include:
  - company reports
  - sector notes
  - economic notes
  - sales commentary.

- Morningstar commentary and data covering Australian financial market summaries and company news include:
  - company significant events
  - consensus estimates
  - current and historical share price movements, Australian and global index data and foreign exchange rates
  - market gainers and losers, turnover, volume and value.
Super is one of the most tax-effective forms of investment, making it a great way to save for retirement.
How super is taxed

Tax is deducted when you or your employer make super contributions from your pre-tax salary. This is called contributions tax. Generally contributions up to certain limits are taxed at a concessional rate of 15%.

Super funds also pay tax on the income and capital gains they receive from their investments. The current tax rate applied to investment income from a super account is 15%. If you have a Choice Income account, investment earnings are tax-free.

Super funds can also receive additional tax benefits through franking credits and capital gains concessions.

Capital gains (or losses) refer to the difference in the value of an asset when you buy and sell it. As a guide, your capital gains that are subject to capital gains tax (CGT) is determined by adding the total of all your capital gains for the income year, then deducting your total capital losses including any net realised capital losses carried forward from previous years.

CGT on superannuation investments like direct shares, ETFs and LICs is 15% for those assets held for less than 12 months. CGT concessions will apply to assets held for more than 12 months (those gains will effectively be taxed at 10%).

Tax on investment income

The Member Direct investment option works a bit differently to other AustralianSuper investment options. The earnings credited to other AustralianSuper investment options are net of any applicable tax, meaning that an allowance for tax has already been made.

Here is how tax is applied to the Member Direct investment option:

- **Cash account and term deposits**: your cash account and term deposits are interest bearing investments. Tax is payable on interest income on an accruals basis (daily as interest is earned). The Member Direct option will accrue the tax payable on any interest accrued in the value of an interest bearing investment and will withhold the applicable tax from the interest income paid into your cash account.

- **Shares**: tax is payable on dividend income upon receipt and will be withheld when the dividend is paid into your cash account. In the case of Dividend Reinvestment Plans (DRPs), tax will be deducted from your cash account when any applicable shares are allotted to your portfolio.

<table>

<th>Initial term deposit investment</th>
<th>$10,000.00</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interest</td>
<td>$123.29</td>
</tr>
<tr>
<td>Tax withheld (at 15%)</td>
<td>$18.49</td>
</tr>
<tr>
<td>Net income</td>
<td>$104.80</td>
</tr>
</tbody>
</table>

Jenny invests $10,000 in a term deposit with a maturity term of three months (90 days) at an interest rate of 5%. After 90 days she has earned $123.29 in interest, which is taxed at 15%. Tax of $18.49 is withhold from Jenny’s cash account.

Sally makes the same investment, but she has a Choice Income account with a 0% tax rate. So no tax is withheld and Sally receives the full interest payment of $123.29.

- **Trusts (including ETFs and LICs)**: tax is payable on trust distributions on a present entitlement or attribution basis. Tax will be withheld when the distribution is paid into your cash account. Where estimated trust components are received, tax will be withheld from the taxable components of the distribution received. Where no estimates are received, tax will be withheld from the total distribution received. When final trust components are received, a ‘true-up’ tax calculation will be performed (see page 27) and appropriate adjustments to the tax cost base of the investment will be made if applicable.

**Capital gains tax**

The Member Direct option will calculate the net CGT liability daily using a year-to-date position. This will accrue within your portfolio valuation. A physical deduction or refund for CGT on realised net capital gains or losses will be made each quarter and will occur within seven days of the following dates: 30 September, 31 December, 31 March and 30 June.

The quarterly CGT provision will take into account any realised capital gains or losses since the previous period and recalculate the financial year to date CGT asset/liability. This may result in a credit or debit to your cash account.

The Member Direct option will also calculate any CGT on your unrealised net capital gains or losses daily to include the resulting tax asset or liability within your portfolio valuation. This calculation will include any unutilised realised capital losses.
Seamless Transfer to Choice Income

Members can maintain their Member Direct listed investments when they transition from super to retirement without triggering a tax-event, or incurring brokerage costs. Requesting a Seamless Transfer to Choice Income means you don’t need to sell-down and re-purchase your holdings, avoiding transaction costs and market risk. More importantly, by using Seamless Transfer, you do not trigger a capital gains tax (CGT) event.

Important information about Seamless Transfer
› Seamless Transfer is tax free. It does not realise any capital gains or losses. When you Seamless Transfer, any unused realised or unrealised capital losses will no longer be useable to offset future realised capital gains in Choice Income.
› You won’t have access to trade, or be able to monitor investments while they’re being transferred. The process to open a new Choice Income account and to transfer your Member Direct account can take up to 14 business days. You’ll receive an email confirmation when the transfer is complete.
› Seamless Transfer cannot commence when certain types of corporate actions are pending.
› Limit orders must be completed or cancelled before requesting a Seamless Transfer.
› Seamless Transfer can only take place after your Choice Income account is set-up. Your new Choice Income account won’t start until all funds have been received (no earnings apply on money during the transfer process and market movements may occur during this period).
› Term deposits are not transferrable with Seamless Transfer. This means we’ll break the term deposit(s) if it is not matured before we complete the transfer. Your effective rate of interest will be reduced in accordance with the discount factors available at australiansuper.com/MemberDirect
› Funds in your cash account will be transferred to your Choice Income account without any change.
› Minimum balance requirements on the cash account and investment limits on balances and trades will continue to apply after Seamless Transfer is completed.

How do I make a Seamless Transfer?
2. Download the Seamless Transfer of your Member Direct account form, to open a Choice Income account, from australiansuper.com/forms
3. Complete the form and submit by post or email. Return details are on the last page of the form.

Certain restrictions may apply. Refer to terms and conditions at australiansuper.com/MemberDirectTCs
Franking credits

Shares can provide tax benefits to shareholders in the form of franking credits (also known as imputation credits). Franking credits are attached to dividends and apply to the amount of tax a company has paid on its profits. Australian companies generally pay tax at a rate of 30%, which is the maximum franking credit investors can receive. Members must hold shares for 45 days (excluding the day of purchase or sale) to qualify for franking credits.

Super funds pay a maximum tax rate of 15% on investment income received. The tax payable on dividends received are adjusted for any franking credits attached to them. The franking credits are credited back to your account and tax is calculated on the adjusted amount. This adds to your net investment returns.

Franking adds to Jack’s super return

Here’s an example of franking adding to investment returns

Jack holds 10,000 shares and receives a fully franked dividend of 4.5 cents per share, which is equal to a cash dividend of $450.

The total taxable income, which equals the cash dividend amount plus the franking credit, is taxed at 15% resulting in $96.43 being withheld from the dividend paid into Jack’s cash account. A total of $546.43 (net dividend income) is paid into Jack’s cash account – almost $100 more than the cash dividend.

George holds the same shares and receives the same fully franked dividend. Because George has a Choice Income account his investment earnings are tax free. The full amount of $642.86 is paid into George’s cash account.

Getting started

Getting started in Member Direct is easy and will give you control and choice over your investments.
Get started
1. Make sure you meet the eligibility criteria
2. Register for an account online at australiansuper.com
3. Log in to your account online and find the Member Direct tile and click ‘Access’
4. Select one of the investment options (content, cash account, term deposits or shares, ETFs & LICs)
5. Transfer the minimum balance required
6. Start investing once the money appears in your cash account (term deposits or shares, ETFs & LICs)

Eligibility criteria:
› be an AustralianSuper member with $10,000 or more in your super account or $50,000 or more in your Choice Income account
› have access to the internet and a current email address
› read and accept the terms and conditions.

Quick reference
› Your total AustralianSuper balance must remain above $10,000 in Super, or $30,000 in Choice Income, otherwise you will need to close your Member Direct account.
› You must keep the specified minimum amount invested in AustralianSuper’s other investment options and $400 in your Member Direct cash account at all times.
› A maximum of 80% of your total AustralianSuper account balance can be invested in shares and ETFs.
› The maximum you can invest in any one listed security is 20% of your total AustralianSuper account balance (different limits may apply to some ETFs).
› The minimum buy trade for shares, ETFs & LICs is $1,500 and the maximum is $250,000. The minimum buy order for term deposits is $2,000.
› The maximum amount you can invest in a single term deposit is $5 million.
› You cannot buy and sell the same security on the same day.
› View the Investment menu at australiansuper.com/MemberDirect

Access your Member Direct account on the go
You can now access your Member Direct account via the AustralianSuper app, without the need to log in separately.

To register and set up your Member Direct account, see Get Started, above.

Once you have registered for Member Direct:
1. Download the AustralianSuper app from App Store or Google Play
2. Using the AustralianSuper app, log into your AustralianSuper account with your username and password
3. Access your Member Direct account by clicking the Access Member Direct button at the bottom of your screen.
Actions and alerts
Your Member Direct inbox is where we will communicate any corporate actions or other important account information to you.

Asset allocation
The process of combining different types of assets in selected proportions to build a portfolio.

Available cash
The amount of cash available in your Member Direct cash account.

Brokerage
A fee charged by a broker for the execution of a transaction, such as buying or selling listed securities; expressed as either a percentage of the total value of the transaction or a flat dollar figure.

Buy or sell order
When you place a trade to buy or sell shares or ETFs.

Capital gains tax
A tax on the increase in the capital value of investments, payable when the capital gain is realised (ie when the investment is sold).

Cash account
The online cash account within the Member Direct investment option. You can use the funds in your cash account to invest in shares, ETFs and term deposits.

Cash transfer
A transfer of money between the Member Direct investment option and your other AustralianSuper investment options.

Choice Income account
This account is for eligible members who draw down their accumulated super savings through a complying retirement income stream.

Corporate actions
An action taken by a publicly listed company relating to its securities. You will be notified of any corporate actions that impact your portfolio in the actions and alerts box on Member Direct. Elective corporate actions are actions you can choose to accept or reject while announced corporate actions do not require any action from you.

Dividend Reinvestment Plan
A Dividend Reinvestment Plan (DRP) automatically reinvests your dividends into more shares rather than providing them as a cash payment.

Exchange Traded Fund
An Exchange Traded Fund (ETF) is a managed fund that tracks a market or sector index and, like shares, is traded on a securities exchange. Member Direct mostly offers ETFs on its menu but there may be other Exchange Traded Products (ETPs) such as Exchange Traded Commodities (ETCs) that could be offered on the menu within this category.

Franking credit
Tax credits that are passed on to shareholders who have received franked dividends in relation to their shareholdings. Also called an imputation credit.

Income payment reserve
The Income payment reserve is the minimum amount you must keep in your AustralianSuper investment options outside of Member Direct to cover future retirement income payments. If your balance is below this amount you can’t transfer more money into Member Direct or invest in term deposits.

Index
An index measures the changes in value of a market or sectors of a market. For example, the S&P/ASX 300 Index (see definition at right).

Investment options
The Member Direct option is one of AustralianSuper’s range of investment options, in which members can invest their AustralianSuper account.

Investment switch
Where you move all, or part, of your account balance from one AustralianSuper investment option to another, excluding the Member Direct option.

Listed Investment Company
A Listed Investment Company (LIC) invests in other companies with the purpose of giving its investors exposure to a diversified portfolio of shares. Unlike an ETF that tracks a specific index, LICs are managed by full-time investment managers who seek to optimise the long-term return on the investment portfolio.

Maturity
The term of a fixed interest security, such as a term deposit.

Other investment options
AustralianSuper’s other investment options outside of the Member Direct investment option. These include PreMixed and DIY Mix options that are professionally managed by AustralianSuper.

Platform
Where AustralianSuper members can buy and sell S&P/ASX 300 shares, exchange traded funds, ETFs and term deposits.

Portfolio administration fee
The portfolio administration fee (PAF) charged to access Member Direct, which includes 20 minute delayed ASX pricing, live stock quotes and Morningstar news, company and market data.

Reserved cash
The amount of cash that is frozen in your Member Direct cash account to maintain your minimum balance and pay for securities purchased that have yet to be completed on the market or placed with the issuer and any outstanding cash transfer requests and CGT liabilities.

Seamless Transfer to Choice Income
A transfer of your Member Direct holdings in your Super account to a Choice Income account without having to sell and re-purchase your assets.

Sector
A group of securities with similar characteristics. Australian shares are divided into different industry sectors based on the Global Industry Classification Standard. For example, clothing companies belong to the Consumer Discretionary sector.

Standard & Poor’s ASX 300 Index (S&P/ASX 300 Index)
The S&P/ASX 300 Index is recognised as the industry standard for measuring the performance of the top 300 companies in the Australian share market.

Stock code
A unique code used to identify companies listed on the Australian Securities Exchange (ASX). Also called an ASX code.

Stock quote
The latest market price of a share or security. Stock prices are available ‘live’ via the trade order pad and with a 20 minute delay when you conduct a ‘stock quote’ on Member Direct.

Super account
This account is for members who are building (or ‘accumulating’) their superannuation savings through personal and employer contributions in AustralianSuper.

Term deposit
A deposit at a banking institution, which pays a set interest rate over a specified investment timeframe.

Trade
To buy or sell securities, including shares and ETFs.

Watchlist
A model or mock portfolio of stocks or ETFs that you create. Watchlists are useful for monitoring shares you might be interested in buying or those you already hold.

45 day rule
The period members must hold shares for (excluding the day of purchase or sale) to qualify for franking credits.
We’re here to help.
